Macular Shield-S

Macular Degeneration Protection

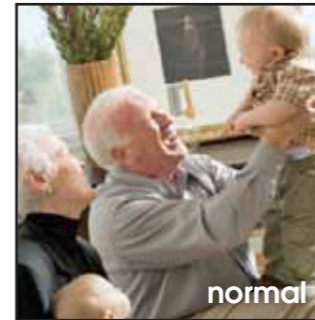

What is Macular Degeneration?

Age-Related Macular Degeneration (ARMD) is a medical condition that results in a loss of vision in the center of the visual field (the macula) because of damage to the retina. ARMD ranges from mild changes with no decrease in vision to abnormalities severe enough to result in the loss of all "straight" ahead vision. Macular degeneration does not cause total blindness because the remaining and undamaged parts of the retina around the macula continue to provide "side" (peripheral) vision.

Age-Related Macular Degeneration is the most common cause of irreversible vision loss in Americans over the age of 60. It is estimated that 10 million Americans will experience this age-related visual impairment.

What are the symptoms of Macular Degeneration?

Symptoms of macular degeneration usually develop gradually. People with ARMD may first notice a blurring of central vision, especially during tasks such as reading, watching television or sewing. Also, straight

intermediate

advanced

lines may appear distorted or warped. As the condition progresses, blind spots may form within your central visual field. In most cases, if one eye has macular degeneration, the other eye will develop it.

"I began researching supplements and came upon Macular Shield by Doctor's Advantage. I can now feel confident knowing I am taking a product that has the best ingredients at the right levels. I am thankful I have found this product and a company who produces superior products. Thank you!"

NANCY B., AGE 65

What is a good treatment option for Macular Degeneration?

Although there is no cure for macular degeneration, there was a major clinical trial sponsored by the National Eye Institute called the Age-Related Eye Disease Study (AREDS). This study proved a daily supplement containing a unique formulation of high-dose nutrients and other ingredients slows the progression of macular degeneration.

After the original AREDS study was completed, the National Eye Institute identified additional vitamins and minerals that also play a key role in slowing the progression of ARMD and therefore, decided to begin a second study. More specifically, AREDS 2 is studying the effects of adding Omega-3 fish oil due to its anti-inflammatory benefits as well as the importance of 2 key carotenoids, Lutein and Zeaxanthin.

What is Macular Shield?

Macular Shield is a daily supplement specially formulated for patients with macular degeneration or who are at high-risk of developing macular degeneration. Our researchers developed a pharmaceutical grade AREDS formula with powerful protection for the macula and the whole body. It also contains EyeShield, a proprietary blend of 15 mg of Lutein, 2 mg of Zeaxanthin and other key nutrients for added macular protection. Macular Shield is also a complete multivitamin.

Macular Shield-S is our special formula for patients who should not take beta-carotene, including those who have a history of smoking within the past 20 years.

Pantothenic Acid (as Calcium-D-Pantothenate)	10 mg 100%	† Daily value not established.	

Other Ingredients: Gelatin, Rice Flour, Vegetable Stearate, Dicalcium Phosphate.

How is Macular Shield different from other products for Macular Degeneration?

Unlike the majority of supplements available for macular degeneration, Macular Shield contains the correct amounts of ingredients at the levels proven to be beneficial at slowing the progression of this condition. In most cases, you would have to take several different supplements to equal what is in one bottle of Macular Shield.

How do I take these supplements?

PRODUCT	DOSING RECOMMENDATION
Macular Shield	4 capsules/day
Macular Shield + OmegaShield	4 capsules/day + 2 softgels/day
	2 capsules in the morning and 2 capsules in the evening
	2 capsules and 1 softgel in the morning and 2 capsules and 1 softgel in the evening

What is OmegaShield?

OmegaShield contains 1 gram of molecularly distilled, mercury free fish oil consisting of anchovies, sardines and mackerel, the richest sources of DHA. OmegaShield combined with Macular Shield or Macular Shield-S meets/exceeds the Age Related Eye Disease Studies (AREDS 1 and 2) recommendations.

OmegaShield™

- **Highly absorbable Triglyceride form**
- **No fishy smell or aftertaste**
- **Mercury Free**
- **Supports a healthy heart**
